

# GP-X

The Non Skin GP-X Process Series is ZIPSET's most advanced four color process series due to its strength, stability and superior dry times. It is a Non Skinning Vegetable oil based ink that stays open on press and in the can for up to 2 days. Only the highest grade pigments are used in manufacturing to provide transparent colors which inevitably create the finest trap results. Coupled with a heavy pigment load and innovative additives this series generates the sharpest dot reproduction while maintaining excellent mileage not seen with other brands. The GP-X uniquely combines cutting edge design and technology with over 100 years of manufacturing tradition.

## Special Features
